12 Bulls at Calgary Bull Sale, March 7

12 Bulls at Medicine Hat Bull Sale, March 20

68 Coming Two Year Old Bulls by Private Treaty

Big Group of Coming Yearling Bulls

Semen Of Our Top Herd Bulls

62 Bred Heifers

Welcome

To our Winter 2023-24 Bull & Heifer Offering

Our Families would like to welcome you to our 2023-2024 Bull & Heifer Offering.

We come to the end of another year with it's challenges and some excitements. Moisture was lacking in most of Western Canada and our little corner was no exception. Feeding Cattle on and off most of the summer with grazing the little grass that did grow gets a bit discouraging at times. Thus we conclude that we are on the right track selecting for cattle with better Feed Efficiency.

Looking through the AHA Annual Report one slogan jumps out at me:

EFFICIENCY PAYS NUMBERS MATTER

Lilybrook has collected Feed Efficiency Data for 12 years now and Carcass ultrasound for over 20 years. We succeeded in improving our Dry Matter Intake per pound of Gain (DMG) over the years while keeping the gain the same or a bit better.

Our 2023 Steers hanging at Cargill brought a 1.50\$/CWT above the base price for better Yield and Marbling, in the feedlot they gained at a cost of 144.91\$/CWT which is lower than most across the industry. Some feedlot talk was costs of 170.00\$/CWT, that be 25 cents a pound of gain higher then our steers (bottom half of Bull Crop), 604 pounds of Gain at 25 cents comes to \$151.00 per head more feed cost.

We invite you to take the opportunity of the **Lilybrook Advantage.**

We would like to take this opportunity to **Thank all our Customers and Friends from the bottom of our hearts for your support and business,** we really appreciate your friendships, it encourages us to strive to produce a **better Hereford.**

Please remember we do stand behind our cattle and guarantee them in every respect.

In closing we wish you all a very **Merry Christmas and a prosperous Happy New Year.**

Lilybrook Herefords Inc.

Andy & Margaret Schuepbach with Ruth, Daniel, and Clint & Michelle Unsworth

Please check out our website for more info and updates.

The **Canadian Hereford Association** is pleased to present this sale catalogue on behalf of **Lilybrook Herefords Inc.**

LBH is committed to raising the best Feed Efficient Herefords possible.

We have been promoting our Herefords as **Practical** and **Efficient**. We are committed to raising the most feed efficient cattle we possibly can. We collect, keep track and report any measurable trait and stress sound-footed cattle with good udders and fleshing ability.

In the fall of 2018 we took **Feed Efficiency testing** to a higher level and installed our own on Ranch GrowSafe feed intake testing facility. We are capable of testing 80 Bulls or 100 Heifers at a time and tested all our Bulls and Heifers for Residual Feed Intake.

Lilybrook's ongoing testing for RFI (Residual Feed Intake)

Over the years we have been taking part in the CHA's RFI research project and fall of 2018 we installed our own GrowSafe Feed testing facility here at the Ranch. Combined we have tested 1240 bulls and 992 heifers so far.

We have chosen to show you the Results of testing by posting the Individual GrowSafe RFI EPD's provided to us by GrowSafe Systems. The EPD shows in **Red** the more efficient bulls, as in feed intake is less than expected. Looking at LBH 491K he is more efficient at **-0.4098** then LBH 17K at **-0.2846** and he way outperformed LBH 203K at 0.4210.

We would like to invite you to look at the full RFI test results on our website. Please don't hesitate to contact us for answers and more info.

What does RFI stand for?

It stands for Residual Feed Intake. Actually RFI is a measure of the variation in feed intake that remains after the requirements for maintenance and growth have been met. **Efficient animals eat less than expected** for their size and growth and have a **negative or low RFI**, while **inefficient animals eat more than expected** for their size and growth and have a **positive or high RFI**. RFI has a good heritability at 0.36 (36%) and little influence or correlation with other traits. Research has shown that selecting for RFI may result in as much as a 9-10% reduction in cowherd maintenance costs, a 10-12% reduction in feed intake, a 25-30% decrease in methane emissions and a 15-20% decrease in manure production. RFI results are achieved through Feed Efficiency Testing, in our case in our GrowSafe Feed Efficiency testing facility.

**Lilybrook Steers
at Kasko's Feedlot**

BETTER YOUR BEEF HEREFORD

The Lilybrook Advantage

Lilybrook Herefords has been **collecting carcass ultrasound data for over 20 years and actual carcass data on all our steers for 16 years now.** We have also been involved with Feed Efficiency testing for 12 years.

We **invite you to take advantage of our data,** we feel we have come a long ways selecting for carcass traits. We've been

trying to Better your Beef and Herefords long before it became our slogan.

Having said that we still have a ways to go and we need to eliminate the poor ones that give us a negative image as a breed.

Please have a look at a couple sets of steers in our group of 144 steers hanging at the packing plant—88 steers gave us a premium, 14 were at base price and we sadly had 42 with some deductions. 92 steers had AAA marbling and 52 steers had AA marbling.

Now to our table below, two sets of comparable weight steers killed on July 27, 2022 with a base price of \$2.886 per pound rail weight. **LBH 274J & 352J are the kind that we do not want to see with 15 and 16 cents deductions,** why you ask?

Look at the Back Fat, REA and the Yield results—high Back Fat and poor REA results in a poor yield of 5.0 and 5.1, thus the deductions. Looking at **LBH 310J & 403J they have decent Back Fat and big REA resulting in low yield grade at 2.7 and 2.8, thus the premiums.** Now the two bad ones are the poorest we had, with the next poorest at 8 cents deductions, but it shows the extremes on those steers. There is a difference in price per pound of 24 cents or **\$157.44 deductions compared to a \$70.56 premium comes to \$228.00 difference per carcass.**

Wonder which one the feedlot & packer guy remembers, I can guarantee it won't be the premium one—we simply need to improve our carcass in Herefords.

Tattoo	Rail wgt.	Fat in Inches	REA in Inches	Marbling Score	Grade	Yield	Premium/Deductions	\$ Loss/Gain
